

VRF Heat Recovery Outdoor Unit

Central AC & VRF • Project • Price on request

Our VRF Heat Recovery Outdoor Units are designed for offices, hotels, hospitals and large residences that need independent temperature control in every zone. The system recovers heat between zones, cooling one room while warming another, which makes it extremely energy efficient for year-round comfort.

Key Features

- Simultaneous heating and cooling across zones
- Up to 60 indoor units per outdoor unit
- Inverter compressor with part-load efficiency
- Individual zone control with smart panels
- Low ambient operation for extreme climates
- BMS compatible for building management
